The following information is to help people running Norton Personal Firewall that cannot file online with UIFastTax.

These screens are from Norton Internet Security 2004 and there may be differences in other versions.
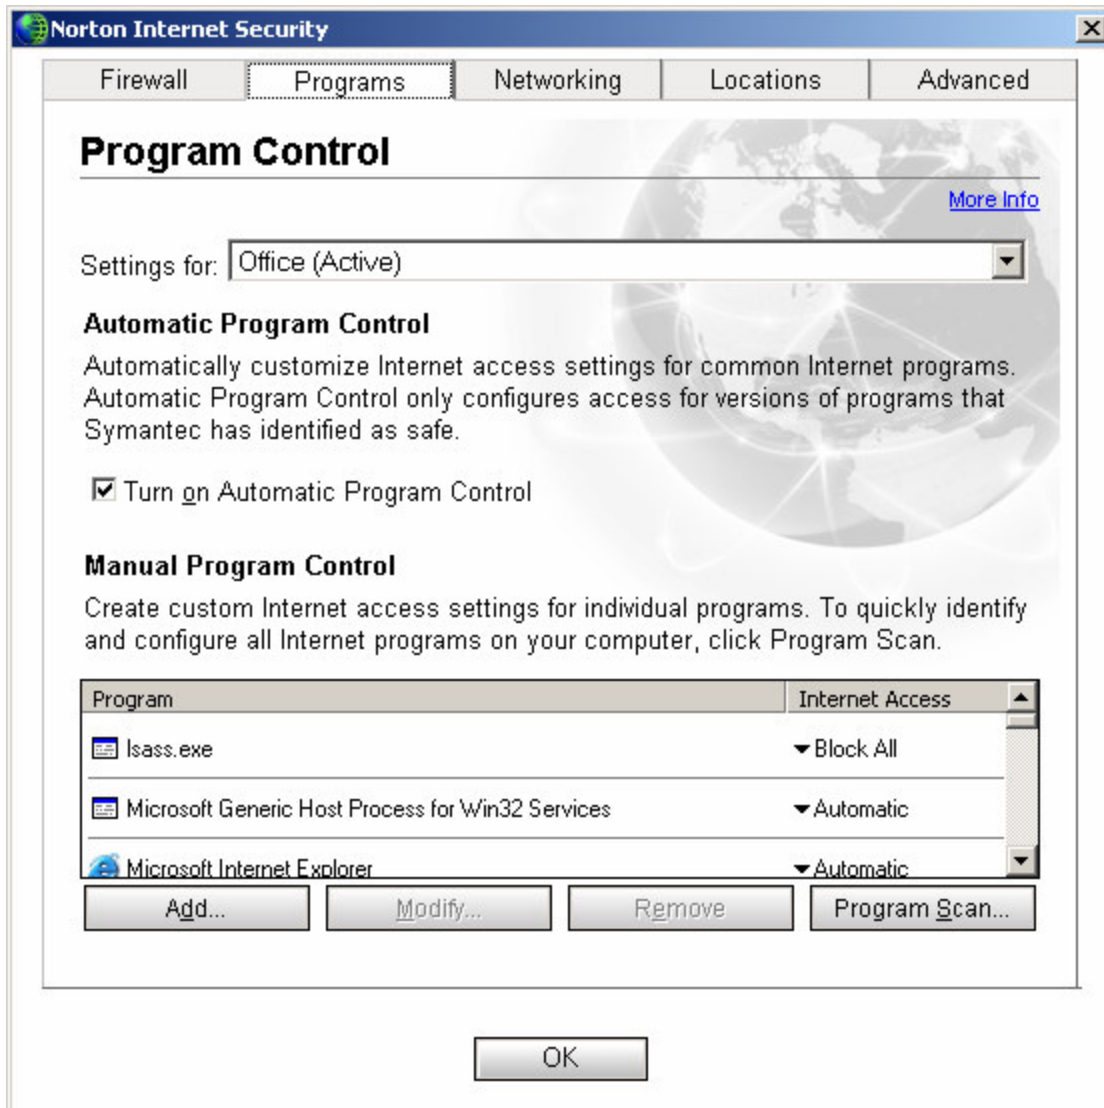

The first screen shot is the Norton Internet Security main screen, to get to this click the Norton icon in the system tray and select Norton Internet Security.

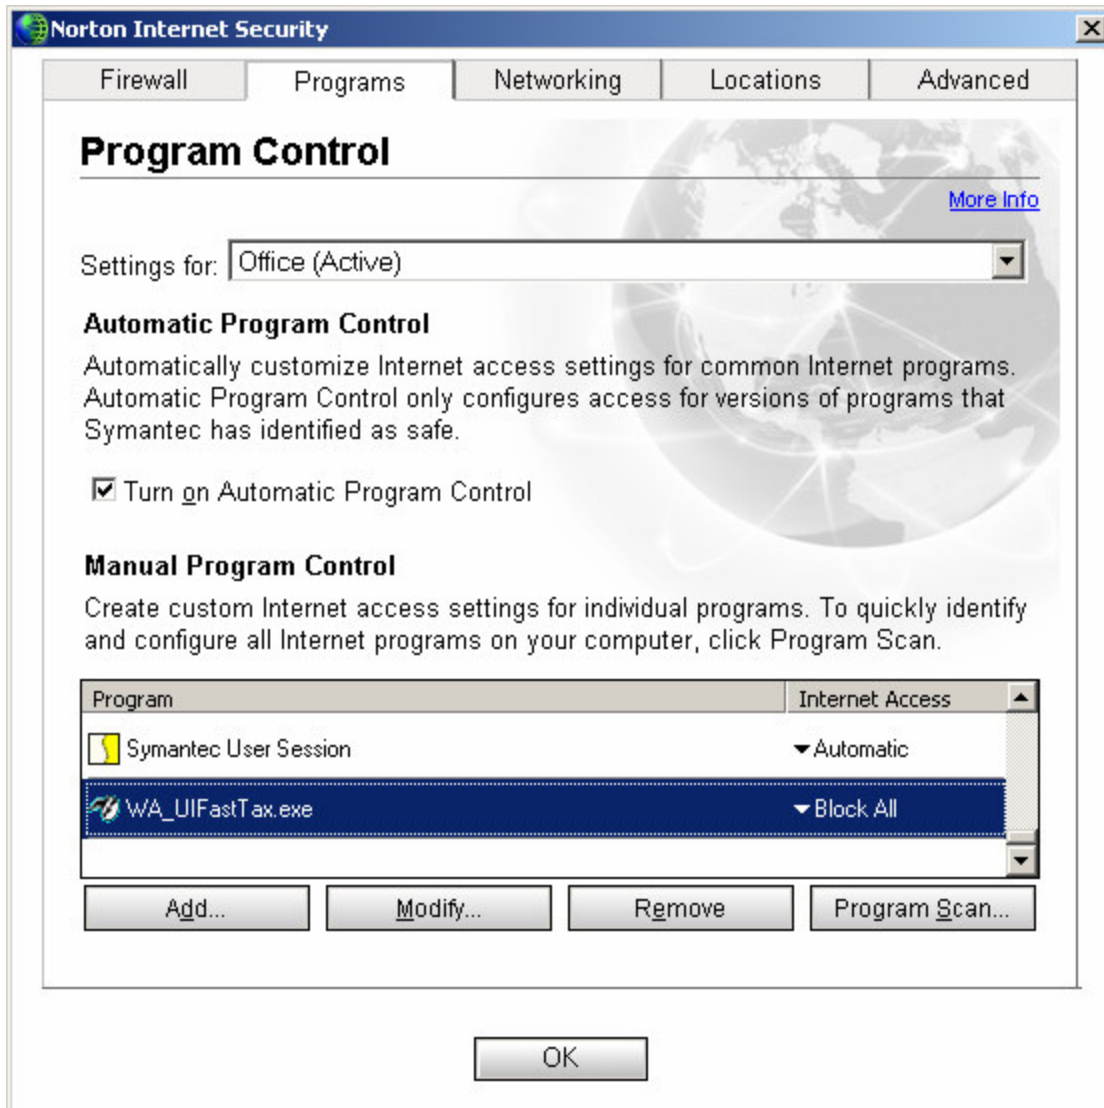

Double click on 'Personal Firewall' or click on 'Personal Firewall' and click 'Configure' to open the next window.
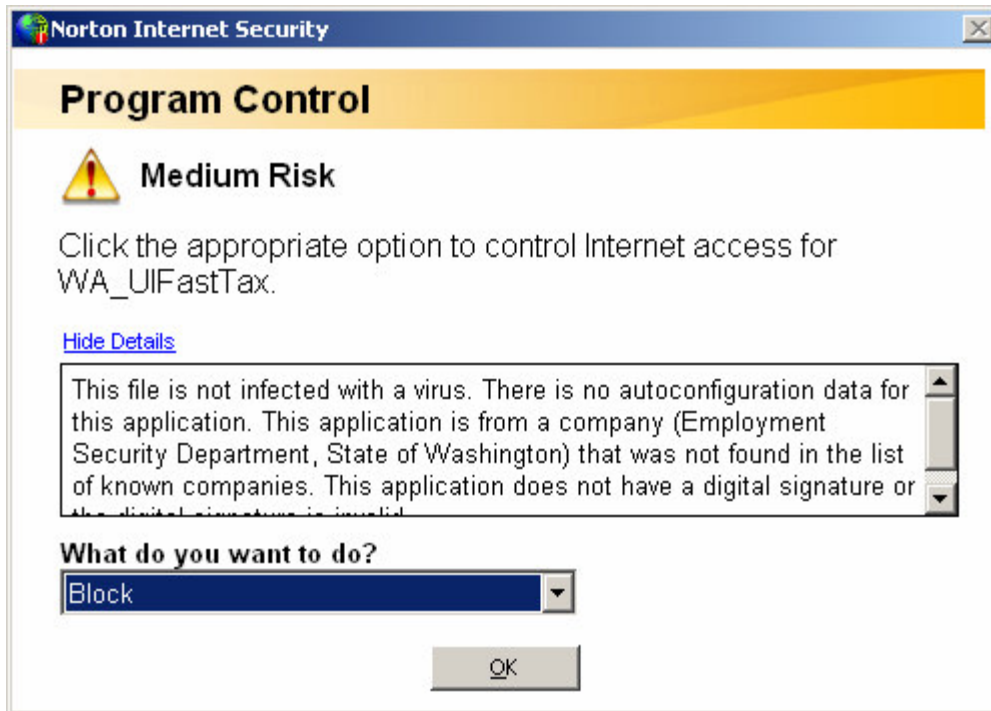

Click on the 'Programs' tab

At the bottom of this screen, under 'Manual Program Control' scroll down to WA_UIFastTax

Click on WA_UIFastTax and then click the 'Modify' button

Under 'What do you want to do?' change from 'Block' to 'Permit', click 'OK' and close.
